Puppy potty training chart

Puppy's name _____

How to use the chart

1. Each time your puppy goes, tick the box for that hour and day: pee, poop or both. Tick the house for an accident indoors.
2. Take your puppy out when they wake up, after meals, drinks and play, before bed, and at least every hour or two in between.
3. Go to the same spot each time, say your cue word while your puppy goes, and reward them as soon as they finish.
4. Never punish an accident. Clean the spot thoroughly, so the smell doesn't draw your puppy back to it.
5. After a few days, look at the ticks: they show the hours your puppy usually needs to go. Plan a trip out just before them.
6. If accidents keep happening despite a steady routine, ask your vet to rule out a health problem.

Signs your puppy needs to go out

- Sniffing the floor, or circling before squatting
- Suddenly stopping play, fidgeting or restlessness
- Whining, barking or scratching at the door
